A. Input from Commission Members on Data for May 2023 Meeting

Larry Nadler reminded everyone of the data categories that are shared during the annual data meeting. When asked if any other types of data should be added to the report, LaTricia Hillman recommended that a report on the Social Services Liaison position be included. Furthermore, Edna Southard suggested that data on gender be included.

Acting Chief Robinson explained that an intern is working on an evaluation of the Social Services Liaison position with one of its goals being collecting data for next year's budget proposal. With the position still being relatively new, Acting Chief Robinson stated a general report, including successes and unmet needs of the position, could be incorporated into the report.

Regarding including data on gender in the report, Acting Chief Robinson stated that this should be discussed in the fall as a possible category to include in next year's report. With it already being February, it is too late to start collecting the data for this year's report. He also reported it is difficult data to collect because it is not a question officers ask of people.

B. Public Participation

Next Meeting: May 18, 2023 at 7 p.m.
